

INFITEC

Excellence in 3D

PARTNER FOR 3D TECHNOLOGY

CINEMA

3D theatres with Infitec technology

Modern, robust glasses for lamps and laser projection

Customized

Supply of replacement glasses or spare parts.

THEME PARKS

Attractions in popular theme parks with 3D- Technic from Infitec.

PLANETARIUM

The final frontier
Amazing 3D shows to the infinite expanses of our Universe

MUSEUMS

New immersive experience possibilities

Exploration of inaccessible places or virtual tours.

Visual presentation of scientific content.

Virtual „exhibits“

Traveling exhibitions

SIMULATION

Infitec is perfect for professional simulation environments

Infitec is utilized in driving, aviation, and design simulation around the world

Infitec passive 3D systems allows for long duration comfortable viewing

Take advantage of our comprehensive service

In depth on target consulting

Quality and sustainability: Recyclable, Durable, low maintenance glasses with an average lifespan of approximately 3,000 wash cycles

Infitec has glasses for all types of applications and we design and customize frames with guaranteed exclusive property rights protection

Patented 3D technologies „made in Germany “

NEW PRODUCT BY INFITEC

TV projection as compared to OLED or LCD displays suffers from lower contrast when having daylight on the screen

There are specific screens that may improve image contrast to a certain extent but those solutions are cumbersome and expensive. Specifically with pure Laser TV projection, we found a totally new way to look TV projection in bright colors and full contrasts even under full daylight

Our Ultimate Contrast Glasses provide for unexpected visual experience not ever seen in TV projection under daylight conditions

INFITEC is an innovative and advanced 3D technology

Our competence and expertise encompass development of advanced 3D systems that are based on our patented interference filter technology

INFITEC is the partner at your side for the realisation of 3D projection that stands for ultimate visual experience.

Let us give you our excellence and enjoy all the benefits in terms of technology as well of service and consulting.

Advanced technology, supreme image quality

Sustainability: glasses are reusable at low maintenance costs by their full passive character.

Suited for lamp based projectors, laser projectors and selected laser phosphor projectors.
